ABSTRACT

This directory lists persons responsible for and materials produced for library instruction at 41 colleges, universities, and community colleges in Pennsylvania. Entries are arranged alphabetically by institution. Each entry provides the library name and address; the name of the contact person for library instruction and his/her telephone number; an indication of the contact person's expertise and ability to consult on the production of materials; and a brief listing of instructional materials produced by the library. For each production, the directory lists its title, format, date, author, viewing time or length in pages, subject, level (introductory, intermediate, or advanced), and availability (free, for sale, available through interlibrary loan, or available onsite only). An additional notation is made if the production is "location specific," i.e., designed for use in a particular library. A total of 89 individual publications are listed. (ESR)

## PREFACE

At a meeting of the PLA Library Instruction Committee held in Philadelphia in summer 1981, a subcommittee was formed to consider the possibilities for assembling a directory of library instruction materials produced by libraries across the state. After much correspondence, a form was developed and mailed to over two hundred libraries in the state. Returns were rather small; many libraries returned entry questionnaires with apologies that they had nothing to list; but they expressed interest in examining materials produced by other institutions. It is hoped that this directory will foster interchange among libraries actively producing instructional materials and those desiring to produce such materials but who need some expert assistance.

Many thanks are due to Suzanne Smith and Patty Thibodeau for their assistance.

## HOW TO USE THIS DIRECTORY

Entries in the directory are arranged alphabetically by institution. Each entry provides the library name and address; the name of the contact person for library instruction and his/her telephone number; an indication of the contact person's expertise and ability to consult on the production of materials; and a brief listing of instructional materials produced by the library. For each production, the directory lists the viewing time or length in pages; subject; level (introductory, advanced); whether the production is "location specific," i.e. designed for use in a particular library; and whether production is available free, for sale, through interlibrary loan, or onsite only.
